TOOL TRACKING SYSTEM

« TOOL TRACKING »

SmarTrack
AGILE ASSET TRACKING & MANAGEMENT

SMARTRACK Tool Management System is an elegant software suite designed to professionally and effectively manage tool, tool boxes and tool storage warehouses. The system will assist maintenance and logistics personnel in the lifecycle management of all tools, equipment and materials used in maintenance operations. Targeted functionality allows the user to merge critical data elements for life cycle management of tool sets, kits and outfits to include issue, receiving, inventory, maintenance and calibration and lost tool location tracking. This comprehensive package will improve asset visibility and streamline the warehouse operations and improve overall readiness.

SMARTRACK TOOL TRACKING

SmarTrack Tool Tracking features four subproducts, which can be integrated into the software package.

ASSET MANAGEMENT SYSTEM

Provides asset accountability with total life cycle management for all tools, kits, sets and outfits along with large tool storage. RFID Smart Tables allow for joint changeover inventories to be conducted in minutes.

INVENTORY MANAGEMENT

With RFID/RTLS and GPS available tagging, inventory of all assets can be accomplished in minutes instead of days. Hand held computer inventory equipment health checks will ensure all selected equipment is mission ready and not expired.

MAINTENANCE AND QC TRACKING

Accurate tool maintenance, calibration and qualification tracking along with a built in tool maintenance work flow management allow you to stay on top of tool availability. Scheduled and unscheduled maintenance activities along with readiness statistics allow effective decision making for upcoming missions.

DATA MANAGEMENT

All critical equipment expiration and life data will result in accurate alerting and warnings of expired equipment during all issues, returns and inventories to identify and keep stock fresh and mission capable.
